INTRODUCTION

My name is Emile Lassalle, student at EPITA Paris, a computer science engeneering school. I spend my time fixing bikes, especially electric bikes, for living. I see in bicycles a beautiful way of going everywhere I want to go (as you can see I am a parisian), and electric bikes are a great way of mixing computer science and my passion.

EXPÉRIENCES

2020-TODAY
Bicycle mechanic
I repear bicycles of everyone I know

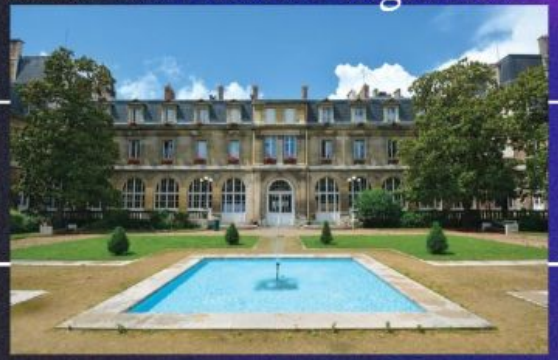
2024
Kitchen porter
For a month I cleaned dishes in a french restaurant

2023-TODAY
Maths teacher
I have been teaching maths to middle school students

ACADEMIC BACKGROUND

MIDDLE SCHOOL

I was at Janson de Sailly in middle school. It is the biggest middle school of all of france and there are 12 classes of each level. Every student understands that they are one in a thousand and learn how to live together.



HIGH SCHOOL

In high school I went to Victor Duruy, a very prestigious high school in the 7th arrondissement of Paris. I got my Baccalauréat with the mention very good. My specialities where Mathematics and physics. I understood that science was the field that I wanted to study.

BIKE MECHANIC

It has been a few years now that I have been fixing bikes. It started by fixing my mom's and her friends bikes. They leave their bikes in the morning at my place, I go get everything that needs to be changed at the store, I fix the bikes then get paid. Now a lot of people come to me to fix their bikes. It has thought me to learn on my own how bikes work, and thought me how to create my own little biseness.

KITCHEN PORTER

For a month I was working as a kitchen porter in a french restaurant named Le Loup. Kitchen porter is a very discret job but essential. It has thaught me to listen to everything my manager says and how hard work can accualy be. It is a very difficult job because you are blocked from the sunlight all day washing dishes with no one to talk to. I am now very thankful and thoughtful of people who do these discrete but very essentiel jobs.

MATHS TEACHER

Being a math teacher for middle school children hasn't just thaught me more about the basics of maths, but on a human level it has thaught me how to explain clearely to children and how certain people think and how they understand things. As a teacher you also have some organisation to do, teachers have to prepare the classes and prepare a class so that there is something to study. So this experience has taught me how to be more orginised.

PROJECTS

2025

Video Game

With a group of friends we created TRIBZ, a video game.

2023

Boxing

I participated in a boxing tournement

TRIBZ

Tribz is a video game created last year with a group of friends. It is a city builder and a survival game. I was in charge of the UI/UX aswell as the multiplayer part of the game. This experience has made me understand how to work in group, trust others and make them trust me. I aslo understood a lot about how the create and develope a video game.

BOXING

In 2023 I boxed a lot and my teacher offered me to go to a tournement, so I did. I finished second. This experience made me see how good sportmanship is necessary to have a good time while doing sports. Thanks to this lesson I have now good sportmanship mentality and It teaches how to always respect others. Boxing is a very good sport to understand respect aswell as discipline.

CONCLUSION

All of these experience have thaught me a lesson, I have learned fast and understood every assignment I have been throught. I have a lot of ambitions and good Ideas. I like to work because it gives me a good mental health and makes me feel useful. I have a lot of future projects in mind that may have already started. Right now I am preparing an exchange in Vietnam for four months. Thank you for reading my experiences and stories.
